FIG. 4a

MIP-1 α

M3 inhibits binding of MIP-1 α to their natural receptors expressed on U937 cells.

FIG. 4b

IL-8

M3 inhibits binding of IL-8 to their natural receptors expressed on U937 cells.

FIG. 5

Heparin and heparin sulfate do not interfere with the capacity for M3 to bind to radio-labeled IL-8 or MIP-1 α .

FIG. 6

M3 inhibits RANTES induced Ca²⁺ flux in human PBMCs in a dose dependent manner.

FIG. 8

Effect of M3 on contact sensitivity inflammatory response in mice.

Values represent mean difference in ear-thickness between control and challenged ears \pm SD. Statistical analysis was performed between M3 treated groups (10 and 100 μg/injection) and the ovalbumin (Pva) control group (100 μg/injection) using Student's T-test (* $p < 0.05$).
